Larry;

Per your instruction, I forwarded to jonathan the summary and region 6 update sent to HQ and region 6 senior leadership and management earlier today from the HQ EOC mailbox.

Please send RMP, enforcement info and our summary to Jonathan.

Thanks.

Larry,

After a brief discussion here, we suggest you contact OGC to determine what can be released to the Hill. In general we'll want to release as much as we can to the Hill even if we need to work with OCIR to have it especially noted that it's deliberative (or the correct term).

For press I assume you already know what can and can't be released when we're asked.

Vicki and Shawna -

Kathy Franklin is sending you the non-OCA part of the Williams RMP.

Note it does not contain OCA (Off-site Consequence Analysis) data. Note that they are reporting two accidents in their 5-year accident history. One is an explosion on Sept 5, 2012 that caused property

9453532

damage. No injuries or deaths. Another incident involving a fire on Jan 28, 2009 with property damage. No injuries or deaths.

Also note that they are a member of API, which has NO VOLUNTARY STANDARD like Responsible Care. West Fertilizer was also not enrolled in a voluntary program.

Vicki - the Hill is asking for the RMP, and other requests will come, so we want you to first see it and let us know if there are any land mines in there. We don't see any. Please do NOT release it outside the Agency until Mathy clears you to do so. Once it is out, it will generate press and we want to be ready.

Shawna, Mathy will need to release Vicki to let this out, both to press and to the Hill.

I think we should make the API point. Let them take some of the heat.

L
